What Do Plants and Animals Need?

Name: _____ Date: _____

Plants and animals need food, water, air, and a home to live and grow. We can care for the Earth by using less, reusing things, and recycling.

Draw a line from each living thing to what it needs!

Some things are NOT needs. Do not draw a line to those!

PLANT

SUNLIGHT FOOD WATER TOY

DOG

CLOTHES WATER AIR FOOD

FROG

BLANKET WATER HOME SUNLIGHT

Circle the ways we care for the Earth!

RECYCLE

PLANT A TREE

LITTER

Needs: plant needs sunlight and water. Dog needs water, food, and air. Frog needs water. Not needs: plant does not eat food and does not need a toy. A dog does not need clothes to live. A frog does not need sunlight or a blanket, and a house is not a frog's home, a frog's home is a pond. Only plants need sunlight to make food. Care: recycle, plant a tree.
